

Solar Battery Rebate Application

Mohave Electric Cooperative Members can receive a \$500 rebate for installing a 5 kWh or larger battery to their solar system. Rebates are for out-of-pocket expenses for the battery, installation, and permit fees. MEC requires the installation of smart or WI-FI enabled batteries to receive this rebate. By receiving this rebate, members agree to avoid charging batteries from the grid during peak hours Rebate application must be accompanied by installation receipts and signed off building permits. By applying, members agree to provide log in information for their battery upon request by the utility
Effective January 1, 2023.

- The SunWatts Solar Battery Rebate provides Residential and Commercial Members with a one-time rebate toward the purchase and installation of a battery for use with a member owned renewable energy system.
- Batteries may require updated electric panel or electric service at additional expense to the member.
- Rebates are limited to one rebate per new battery system purchase per service address.
- Rebates will be paid to the Coop Member on the account only, rebate cannot be assigned to a third party.
- All installations must be made by Arizona licensed Electricians and inspected by an MEC representative.
- There must be a label on the main electric panel stating that there is a battery backup system, labels on the charge controller, DC Disconnect switches, critical load sun-panel, combiners, and the batteries or battery enclosure. Labels must be Embossed plastic and be riveted or bolted in place.
- Eligible battery systems must meet the minimum requirements of a 5kWh usable capacity rating and a warranty of at least 10 years or 5000 cycles, with one cycle being defined as a full discharge. The system must also be programmable to operate in self consumption mode.
- A W-9 tax form must be received before rebate will be issued.
